BCI

BCI, Neurofeedback & Assistive Technologies

BRAIN VISION

Solutions for neurophysiological research

Advanced Solutions

for BCI Applications

- High data quality
- Modular hardware portfolio
- Compatibility with all major BCI frameworks
- Free technical support

Flexible amplifier options

- ✓ Real-time data access in < 1ms
- ✓ Portable (8 to 64 channels)
- ✓ Stationary (up to 160 channels)
- ✓ Synchronize with external hardware using
- ✓ Add extraphysiological sensors (ECG, EMG) for hybrid BCI
- ✓ Compatible with fNIRS & fMRI

Flexible amplifier options

✓ passive ✓ active ✓ active dry ✓ sponge

Software solutions

- ✓ Compatibility with all major open source BCI software solutions:

- ✓ Use methods in Brain Vision Analyzer 2 for offline analyses
- ✓ Raw data access using TCP/IP connection or LSL
- ✓ Build your own software using our SDK
