actiCAP Xpress

BRAIN VISION
Solutions for neurophysiological research

Recording EEG

the faster and easier way!

Get your **actiCAP Xpress** bundle incl. EEG recording system and software package today!

- Fast to apply
- Comfortable
- Versatile
- Easy to use
- Robust

BrainVision.com

Electrodes

16 active signal electrodes (plus reference and ground) guaranteeing low noise levels and good data quality.

QuickBits

38 gold-plated exchangeable dry sensors with different shapes and lengths to ensure stable contact with the scalp and high wearing comfort.

Soft Caps

78 possible electrode positions on the cap offer a flexible channel layout. 30 integrated electrode holders can be easily re-positioned. Elastic fabric and additional holes allow to exchange QuickBits even when the cap is already mounted.

V-Amp Amplifier

Versatile, USB powered 16ch amplifier. Records EEG, EOG, ECG, EMG as well as peripheral signals via integrated AUX channels. Can be used with passive, active and dry electrodes.

Software Package

2 months demo license for our signal recording and analysis software (Brain Vision Recorder, RecView and Analyzer 2). OpenViBE for Brain Vision products incl. 3 ready to use BCI applications.

Available Options:

Stand-alone EEG cap with dry electrodes or bundle including 16ch EEG amplifier and software package.
